

Areas of Expertise

Electrosonic is an international audio-visual company with extensive experience in designing, engineering and supporting professional AV systems. Electrosonic provides complete integrated services through the skills and expertise of engineers, project managers, AV designers and technicians throughout the world. We are committed to providing you with the best solutions regardless of product manufacturer.

The Control Rooms Team

The Control Rooms team possesses an unmatched level of experience and knowledge in the image processing, virtual switching, image display and streaming technology markets. While Electrosonic has supported the private sector for over 45 years, the company has provided complex initiatives over the last 15 years for major Government Integrators, state and local government, military and the Intelligence Community.

Service Solutions

Besides integrated solutions, Electrosonic provides an extensive list of support services including on-site dedicated staff, a critical spares equipment plan and a cost-effective projector lamp replacement program.

Global Reach

Our organization is capable of quickly supporting solution development, project implementation and technical support all over the world. Electrosonic has been very successful in taking emerging technologies developed for commercial applications and making them relevant for the government market.
